CSA05-DATABASE MANAGEMENT SYSTEMS

LAB OBSERVATION

EXPERIMENT:08

AIM:

To perform subquery and correlated query on the given relations.

QUESTION:

1. Which of the student's score is greater than the average score?

SQL QUERIES:

```
mysql> SELECT r.RegNo, s.SName, r.CourseNo, r.Score
    -> FROM REGISTRATION r
    -> JOIN STUDENT2 s ON r.RegNo = s.RegNo
    -> WHERE r.Score > (SELECT AVG(Score)
       -> FROM REGISTRATION);
+-----------+-----------+----------+-------+
| RegNo     | SName     | CourseNo | Score |
+-----------+-----------+----------+-------+
| 191711341 | Anitha    | C001     |  85   |
| 191711342 | Bharath   | C002     |  78   |
| 191711343 | Charan    | C003     |  88   |
| 191711344 | Divya     | C004     |  80   |
| 191711345 | Eshwar    | C001     |  90   |
+-----------+-----------+----------+-------+
5 rows in set (0.00 sec)
```

2. Which of the students' have written more than one assessment test?

SQL QUERIES:

```
mysql> SELECT s.RegNo, s.SName, COUNT(r.AssessNo) AS Test_Count
    -> FROM STUDENT2 s
    -> JOIN REGISTRATION r ON s.RegNo = r.RegNo
    -> GROUP BY s.RegNo, s.SName
    -> HAVING COUNT(r.AssessNo) > 1;
+-----------+---------+------------+
| RegNo     | SName   | Test_Count |
+-----------+---------+------------+
| 191711341 | Anitha  |          3 |
| 191711343 | Charan  |          2 |
| 191711345 | Eshwar  |          3 |
+-----------+---------+------------+
3 rows in set (0.00 sec)
```

3. Which faculty has joined recently and when?

SQL QUERIES:

```
mysql> SELECT FacNo, FacName, Gender, JoinDate
    -> FROM FACULTY
    -> ORDER BY JoinDate DESC
    -> LIMIT 1;
+-------+---------+--------+------------+
| FacNo | FacName | Gender | JoinDate   |
+-------+---------+--------+------------+
| 105   | Smitha  | F      | 2024-05-18 |
+-------+---------+--------+------------+
1 row in set (0.00 sec)
```

4. List the course and score of assessments that have the value more than the average score each Course

SQL QUERIES:

```
mysql> SELECT c.CourseNo, c.CourseName, r.AssessNo, r.Score
    -> FROM COURSE c
    -> JOIN REGISTRATION r ON c.CourseNo = r.CourseNo
    -> WHERE r.Score > (SELECT AVG(Score)
      -> FROM REGISTRATION r2
      - WHERE r2.CourseNo = c.CourseNo);
+----------+-------------------+----------+-------+
| CourseNo | CourseName        | AssessNo | Score |
+----------+-------------------+----------+-------+
| C001     | Statistics        | A02      |  85   |
| C001     | Statistics        | A03      |   90  |
| C002     | Programming       | A01      |   78  |
| C003     | Database Systems  | A02      |   88  |
| C004     | Computer Networks | A02      |   80  |
+----------+-------------------+----------+-------+
5 rows in set (0.00 sec)
```

RESULT:

The records from the tables are displayed using Sub-Query and Correlated Sub-Query.
